OUR PURPOSE

Beyond Security to Peace of Mind

At Securex, we go beyond security solutions; our mission is to bring peace of mind to our clients. Prioritizing their safety and interests, our team, the 'Securex Heroes,' embodies our values to deliver unmatched service. Trust us to be your unwavering guardian, ensuring security and serenity.

Creating Freedom By Making Everyday Life Safer

OUR VALUES

**United as Family,
Committed to Excellence**

We Are Family

Our robust family values propel our security growth. United, we foster belonging beyond the workplace, strengthening our commitment to protect and serve clients as family.

Whatever It Takes

By doing whatever it takes we show our dedication to client safety and satisfaction by consistently going above and beyond, distinguishing us in the security industry.

WHAT WE OFFER

DESIGN

BUILD

OPERATE

MAINTAIN

1 CUSTOMIZED SECURITY SOLUTIONS

We tailor our security solutions based on the specific needs and risk profile of each client, ensuring that every aspect of their security requirement is covered.

1 QUALITY MANPOWER

Our highly trained and experienced security personnel are capable of managing a range of security scenarios, ensuring peace of mind and safety for our clients.

1 24/7 MONITORING AND RESPONSE

Our security operations are active 24/7, with real-time monitoring and rapid response capabilities to handle any security incidents.

1 ONGOING TRAINING

We invest in continuous training and development of our security personnel to ensure they are equipped with the latest skills and knowledge.

2 THREAT AND RISK ASSESSMENT

Our team of experts conduct comprehensive threat and risk assessments to identify potential vulnerabilities, and design security strategies accordingly.

2 INNOVATIVE TECHNOLOGY INTEGRATION

We integrate advanced security technologies such as surveillance systems, access control, alarm systems and more into your security framework.

2 PROFESSIONAL SECURITY MANAGEMENT

Our team manages all aspects of security operations, ensuring smooth and uninterrupted protection.

2 SYSTEM MAINTENANCE AND UPGRADES

We offer regular maintenance and upgrades for all our security systems to ensure they are always at their most effective.

3 INNOVATIVE SECURITY SYSTEMS DESIGN

We leverage the latest technology and intelligence to design innovative and comprehensive security systems that are best suited to your needs.

3 REGULAR OPERATIONAL AUDITS

We build robust security infrastructures, both physical and digital, to ensure the protection of your people, property and information.

3 PHYSICAL AND DIGITAL SECURITY INFRASTRUCTURE

We conduct regular audits of our security operations to ensure compliance with best practices and to identify areas for improvement.

3 CONSISTENT PERFORMANCE EVALUATION

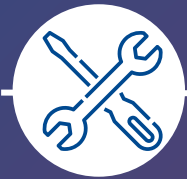

We undertake regular evaluations of our security systems and personnel to ensure the highest levels of performance are maintained.

OUR 10 STEP APPROACH

Risk Assessment

We begin by conducting a thorough risk assessment to understand the unique security challenges and vulnerabilities of each site. This helps us determine the appropriate security measures required.

Customised Security Plans

Based on the risk assessment, we design a customized security plan that integrates both manpower and technology to address each client's unique needs.

Advanced Security Technology

We utilize cutting-edge security technology like CCTV surveillance, access control, intrusion detection, and alarms to create a comprehensive security infrastructure guarding against threats.

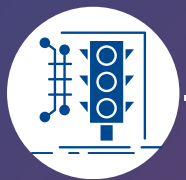

Integrated Systems

Our security design ensures seamless integration of different systems. This enables more efficient monitoring and faster response times during incidents.

Layered Security Approach

We believe in a layered security approach. This means having multiple security measures in place, so that if one line of defense fails, another is ready to counter the threat.

Traffic Flow Management

We design the security layout to manage the flow of people and vehicles effectively, reducing the chance of unauthorized access and ensuring optimal surveillance

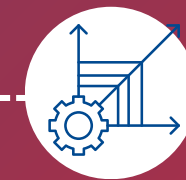

Emergency Preparedness

Our designs also take into account emergency situations, with clearly marked exits, emergency response plans, and other safety measures.

Sustainable Design

We aim to design security systems that are energy-efficient and environmentally friendly, minimizing their impact on the environment while still offering top-tier security.

Scalability

Our physical security designs are scalable and flexible, capable of adapting to changes in the security landscape, business growth, or evolving client needs.

Continuous Improvement

We believe in a cycle of continuous improvement. We regularly review and update our security designs based on feedback, technological advancements, and changes in security threats.

OUR SOLUTIONS

SECURITY+

Access Control

Regulate and track entry into and out of your premises

Explosive Detection Systems

Uncovers the faintest traces of explosives, often invisible to human perception

Fire Detection Systems

Rapid alert and response for fire safety.
